Response to Amendment

The Amendment filed on January 28, 2004 has been entered.

Claims 4, 6-8, 13, and 20 have been cancelled. Claims 21-26 have been added.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In Claim 9, the line "as claimed in claim, wherein..." has been amended to read "as claimed in claim 1, wherein..."

Allowable Subject Matter

Claims 1-3, 5, 9-12, 14-19, 21-26 are allowed.

The following is an examiner's statement of reasons for allowance:

In considering claims 1-3, 5, 9-12, 14-19, the prior art fails to disclose or render obvious the claimed computer program product wherein an attribute associated with a pointer to a function identifies the computing device which generated either the first or second protocol processor, the attribute storing a zero value if the fifth computer code device has not previously dynamically generated the corresponding protocol processor and storing a pointer to the corresponding protocol processor if the fifth computer code

device previously dynamically generated the corresponding protocol processor. These features overcome the prior art such as Hurt (US Patent 6539422), and Guck (US Patent 5911776), which only teach transmission using one protocol and have no means of storing a pointer to the protocol processor used for transmission.

In considering claim 21, 22-26 the prior art fails to disclose or render obvious the claimed computer program code mechanism for causing a computer to control a protocol used for data communication between a remote receiver and at least one device where the mechanism includes a sixth computer device configured to transfer the collected events between the remote receiver and the device using a second protocol after transferring the collected events using a first protocol, thereby increasing redundancy. These features overcome the prior art such as Hurt (US Patent 6539422), and Guck (US Patent 5911776), which only teach transmission using one protocol.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
